

CUXArom SPICEmaster

Successful interaction – Flavour concepts for every taste.

Cuxarom – a wide range of flavour blends to increase the acceptance of feed. Perfectly coordinated for all animal species of all age groups. Stimulates constant feed intake, particularly in stress situations. The advantages of supplementation: Cuxarom provides feed with a long-lasting, pleasant smell and thus recognizability even with changing raw materials.

Spicemaster – a high quality selection of herbal blends to support animals in stress phases. The natural ingredients either support the natural balance of the microbiome or help to optimize the energy balance. The advantages of the supplementation: Spicemaster provides a natural way to balance high performance and health.

High stability. The perception of flavours is based on their volatility. The challenge lies in developing products that have an intensive but constant and long-lasting flavour profile. Special production and formulation technologies are used to ensure that our Cuxarom products are particularly stable.

carefully selected raw materials of defined quality and in precise concentration results in harmonious products. Flavour profiles that are persuasive through their intensity and balance.

Flexible use. Cuxarom is available as free-flowing powder formulations also for use in water-soluble carriers for e.g. milk replacers. Liquid flavour blends can be sprayed onto products at the end of the production process. Spicemaster products are heatstable powders and can be used in mash or pelleted feed alike.

Safe packaging. Cuxarom: free-flowing powder in special aroma-tight bags of 25 kg or 250 - 500 kg big bags and ready-to-use liquid formulations in 25 kg canisters, 180 - 200 kg barrels or 1,000 kg IBC. Spicemaster: 20 kg/25 kg bags or 300 kg big-bags.

What is special about Cuxarom:
