

LOVIT

Effective solutions for poultry flocks.

With Lovit we offer a wide range of formulations containing vitamins, trace elements and other feed additives for application via drinking water lines. Safe and targeted support for poultry flocks. Fast, easy, effective.

Targeted supplementation. Feed intake often decreases during stress phases while water consumption remains constant for longer periods. Drinking water is therefore the ideal means of achieving an adequate uptake of active ingredients in critical situations.

The features of Lovit:

- Formulations especially optimised for poultry
- Wide range for a variety of different indications
- Easy handling and dosage

Easy handling. Lovit products can be applied quickly and easily as granules, powder and liquid, thus enabling a targeted reaction.

Effective start. During the first few days of life animals are more likely to begin drinking before they start eating. For this reason the safest way of compensating nutritional deficiencies in young animals is via drinking water application.

The causes of additional nutritional requirements can be:

Insufficient feed intake. Particularly in very young animals feed intake decreases during stress situations (e.g. high ambient temperatures, change of housing, transport, change of feed, illness) or as a result of digestive disorders.

Increased requirement. In periods of particularly fast growth, in case of subclinical diseases, following veterinary treatment, and/or prior to vaccination the organism is increasingly reliant upon a variety of active ingredients.

Packaging: Ready to use as liquid in canisters of 5 liters and bottles of 1 liter, or as granules or powder in bags of 10 kg, 5 kg, 1 kg or 750 g.

Category	Nutritional maintenance of	Important ingredients and suitable Lovit products	Formulation as (colour code)		
Functional support	Fertility	Vitamin E, and selenium LOVIT E+Se	 Liquid		
	Skin, claws, footpad	Biotin, zinc and methionine LOVIT Granule Skin Plus	 Granules		
	Skeleton and egg shell quality	Vitamin A, vitamin D3, vitamin E and calcium LOVIT AD3E, LOVIT Calcifit	 Liquid	 Granules	
Functional support	Skeleton and egg shell quality	Phosphorous, calcium and magnesium LOVIT Phos	 Liquid		
Hydration	Electrolyte and water balance	Vitamin C, sodium ascorbate, electrolytes and trace elements LOVIT Cool, LOVIT EC+Se, LOVIT Anilyte+C	 Liquid	 Granules	 Powder
Stress	Immune function	Amino acids and vitamins LOVIT Amino Plus	 Liquid		
	Balanced behaviour	Vitamin E, vitamin B12, niacinamide and magnesium LOVIT Balance	 Liquid		
	Recovery	Vitamin B complex and vitamin K3 LOVIT Granule BX, LOVIT Multivit	 Liquid	 Granules	
Gut function	Normal microflora and digestion	Zinc, garlic oil, oregano oil and <i>E.faecium</i> LOVIT AlliZinc, LOVIT Progano, LOVIT Probiotic	 Liquid	 Powder	
Metabolism	Liver function, energy and fat metabolism	L-Carnitine, choline and betaine LOVIT LC-Energy, LOVIT Hepavent	 Liquid		
Respiration	Respiratory system	Essential oils LOVIT Breeze	 Liquid		
Complementary Lovit products					
Support during vaccination	Water stabiliser Technical tool	LOVIT Blue C	 Granules		
Biofilm prevention	Technical tool	LOVIT Acid	 Liquid
